PROFESSIONAL SUMMARY

Full Stack Developer with 6 months of experience (2025–Present) in web application development using **Laravel, PHP and RESTful APIs**. Demonstrates strong expertise in **backend development, database management, API integration, and scalable architecture design**. Proven ability to develop **full-stack applications, optimize performance, and enhance system efficiency**

CORE SKILLS

- Laravel & PHP Development
- MERN Stack (MongoDB, Express, React, Node)
- RESTful API Development & Integration
- Database Design & Query Optimization
- MVC Architecture Implementation
- Frontend Development (React, HTML, CSS)
- Backend Development
- Performance Optimization & Debugging
- Version Control (Git, GitHub)
- Problem Solving & Analytical Thinking

TECHNICAL SKILLS

- Languages: JavaScript, C, PHP
- Frontend: React.js, HTML5, CSS3, Bootstrap
- Backend: Laravel, PHP, Node.js, Express.js
- Databases: MySQL
- Tools: Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

PHP Developer

Present

May 2025 –

Bpract Software Solutions, Kozhikode

- Developed Laravel-based web applications improving system performance and scalability by **25%**
- Utilized Eloquent ORM for efficient database handling reducing query execution time by **20%**
- Implemented MVC architecture ensuring maintainable and modular code structure
- Collaborated with development teams resolving bugs and enhancing application functionality
- Optimized backend processes improving application response time and stability
- Contributed to feature development increasing system usability and efficiency

MERN Stack Developer Intern

2025

Feb 2025 – Apr

Ipix Technologies Pvt Ltd, Kozhikode

- Built full-stack applications using MongoDB, Express.js, React.js, and Node.js improving project delivery efficiency
- Integrated RESTful APIs ensuring seamless data communication across modules
- Performed debugging and testing improving application reliability and performance
- Utilized Git version control maintaining structured and collaborative development workflow

PROJECTS

Online Vehicle Marketplace & Sales Platform

- Developed full-stack platform handling bookings, payments, and order management improving user experience
- Implemented admin dashboard with forecasting model enhancing decision-making accuracy
- Integrated secure payment systems and complaint management modules improving platform reliability

Academic Task Management System

- Built task management platform tracking assignments, projects, and deadlines improving productivity
- Automated internal mark calculation reducing manual effort and increasing accuracy
- Designed scalable architecture supporting multiple academic workflows

Kallose E-commerce Platform

- Developed e-commerce solution for product sales and rentals improving transaction efficiency
- Implemented secure checkout and order tracking enhancing customer satisfaction
- Managed product catalog and user interactions ensuring smooth platform operations

EDUCATION

Master of Computer Applications (MCA)

FISAT, Angamaly
7.7

2025
SGPA:

CERTIFICATIONS

- MERN Stack Development – FISAT & Link Ur Codes
- Introduction to Data Science – Infosys Springboard
- Problem Solving Through Programming in C - NPTEL
- Java Programming (Beginner to Master) - Udemy

KEY ACHIEVEMENTS

- Improved database efficiency through query optimization and structured schema design
- Developed secure authentication systems enhancing application security

ADDITIONAL INFORMATION

- Languages: English, Malayalam
- Availability: Immediate
- Interests: Hackathons, Coding Challenges, Continuous Learning
